Sometimes you will want to include text exactly as it appears on a terminal screen. For example, you might want to include part of a computer program. Not only do you want LaTeX to stop playing around with the layout of your text, you also want to be able to type all the characters on your keyboard without confusing LaTeX. The `verbatim` environment has this effect:

```
The section of program in
question is:
\begin{verbatim}
{ this finds %a & %b }

for i := 1 to 27 do
  begin
  table[i] := fn(i);
  process(i)
  end;
\end{verbatim}
```

The section of program in question is:

```
{ this finds %a & %b }

for i := 1 to 27 do
  begin
  table[i] := fn(i);
  process(i)
  end;
```
